[CV or Resume from June 1998](#) ([PDF](#) or [download MS-word format](#))

I used to be computer consultant. Since June 2000 and until current in 2008, I was not allowed to work and prevented to live by the governments of USA, Germany and Netherlands. Therewith I have first forgotten most of my technical experience; second my technical experience is totally out dated; third I don't want to work as slave for any one whom ever.

However, and since November 1969, I have worked in various jobs and in various fields from warehouses and transportation to cleaning and gastronomy and from 1978 and until 2000 I worked mainly and very heavily in the computer business performing various duties for many international fortune 500 companies, but also for very small businesses and within various fields from manufacturing of multilingual computer systems and software applications to design, planning, implementation and development, training, maintenance and technical support for governments, financial institutions, transportation, manufacturers, consulting companies and many others.

I was kidnapped from USA or England in 1959 and they wiped off my memory and caused me total amnesia to prevent me of recognizing my biological families and where I was born and then placed me within an international crime organization that pretended to be my family. I lived in Damascus, Syria for less than one year in 1959. I lived in Cairo, Egypt for 10 years from 1960-1969. I lived in Munich, Germany for 17 years from 1969-1986, I lived forcibly in USA (by kidnapping me through CIA and American, English and Syrian military intelligence) for 15 years from 1986-2001 and sine 2001 and until now I am forced by the American, German and Dutch governments to live in the Netherlands after 15 years of vicious captivity and persecution in USA.

I was always very responsible, very conscious, honest and hardworking for all my employers and/or clients, which have never paid out for me, and oft I lost my wages. Yet I will never change any of these attitudes that I consider to be good working moral-values. Among others I traveled wherever my job required me to, and very oft worked without holidays for a couple of years and for uninterrupted 60 hours without sleep to make sure my employer keep on track with his needs and as a reward I was persecuted by most of my employers that were helping my biological families cover up for my identity by stressing me, persecuting me and stealing my wages to keep me down, among others and in average by not allowing me to be employed for more than 4 months.

Since July 2000 and unfortunately I was forced to spend all my times between unjustly imprisonments and refugee camps in USA, Netherlands and Germany.

I speak English, German, Arabic, however I hate the Arabic language due to all the persecution and for other reasons and I am learning by force of the Dutch laws reluctantly the Dutch language.

This was in short my honest resume.

**PS.** My identity was falsified in 1959, for details see [list of falsified documents forced upon me since 1959](#), whereby each is build upon the prior one and no one wants to admit to or fix my fake identity.
